

# 3F amino-F24

## 3F amino-F24

3F amino-F24 is an organic aminoacides corrector from several vegetal sources in liquid.

It is indicated to act as activator of the vegetal physiology and life of edaphytes organism, making in this way a global action on plant fertility in a short time. Liquid rooting and bio-stimulant taht induces rooting and after simulates vegetative development of the plant, due to the effect of amino acids, phyto regulators and trace elements. Also due to it biostimulants components it increases production and improves quality of the fruits. Its use is indicated after transplant in all of crops, but plum tree.

It is universally imglied for the control of calcium,nitrogen deficiency and aslinity corrector on soil by foliar, drip or soil uptake.

### Composition

- Organic Matter 56% w/w
- Free Aminoacides 24% w/w
- Nitrogen 9.5% w/w

### Handling

250ml, 500ml, 1 , 5 L, 10 , 20 L, 25 , 50 L, 1000 L.

foliar & soil application

### Foliar application

**Crops:** Field crop, vegetables, ornamental plants, fruits

Rate of application 700-1000 cc/Hectar

foliar & soil application

### Soil application

**Crops:** Field crop, vegetables, ornamental plants, fruit

Rate of application 1750cc-2000 cc/Hectar

foliar & soil application

### Compatibility:

It is compatible with most pesticides commonly used on vegetable, fruit and agronomic crops. Is compatible with soluble fertilizers, except very alkaline products or products

foliar & soil application

### 3F amino-F24

An increase 25%

In the vegetables production (tomatoes, peppers, etc.) has been reachead.

In avarage 11-12% more compared to the competition
