3F Calcinit[®] 15.5-0-0-27CaO

Calcium Nitrate

3F Calcinit[®]

3F Calcinit[®] is a fully water soluble nitrogen and calcium fertilizer. It is a free flowing, fine granular material which dissolves quickly in water without any residues.

3F Calcinit[®] is suited to application through all fertigation systems and drip systems, low throw sprinklers, centre pivots and spray units.

Nitrate Nitrogen Improves

- Directly available for plant uptake, resulting in fast and predictable growth responses.
- None volatile nor adsorbed to soil particles, leaving it readily available to plants.
- The preferred nitrogen source for most horticultural and high value agricultural crops.
- Improves the plant uptake of the cations potassium, calcium and magnesium.

Calcium Improves

- Cell wall strength, leading to better quality, shelf life and lifting marketable crop yields
- Cell wall strength, helping plants tolerate disease and insect infection
- Soil structure, helping to maintain an optimum root environment for high yielding crops

Compatibility

3F Calcinit[®] can be mixed with all water soluble fertilizers, except stock solutions containing either phosphate or sulphate.

Product Specification

Total Nitrogen	15.5%	Solubility (20°C)	1200g/l water
Nitrate Nitrogen	14.4%	EC (1g/l at 25°C)	1.2mS/cm
Ammonia Nitrogen	1.1%	pH (10% solution)	6.0
Calcium Oxide (CaO)	27.0%	Color	white granular
