

# NP Compound Fertilizer

## DESCRIPTION

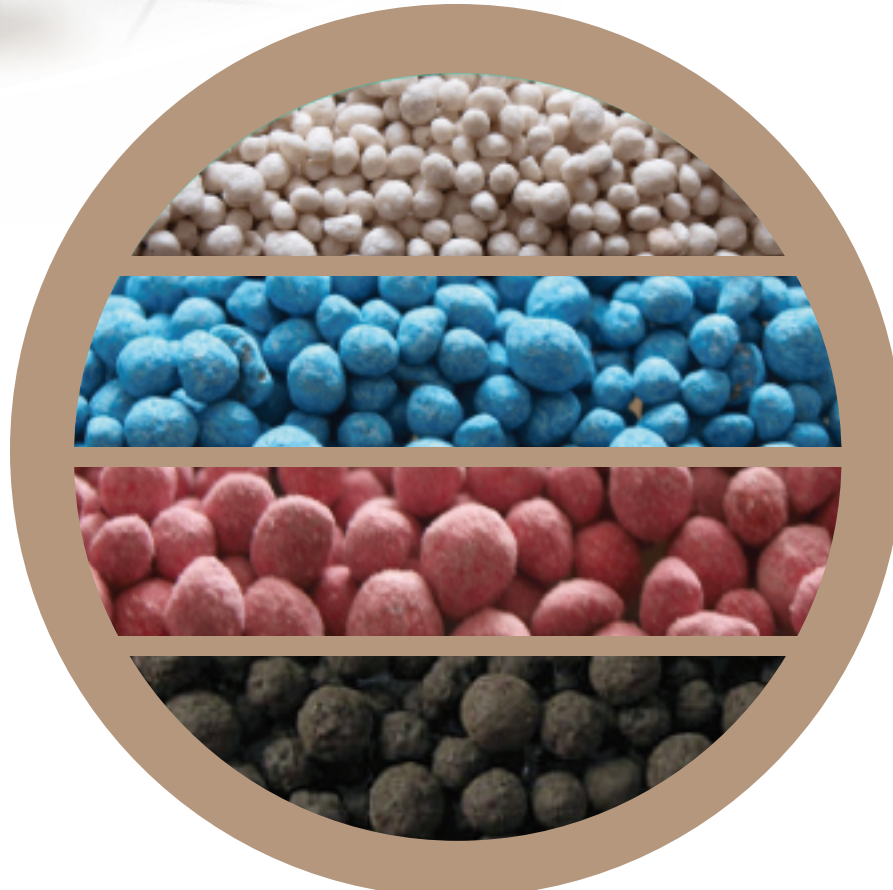

Fitforfarm has become one of the company's fastest growing business segments on compound fertilizers. The company has wide access to products and is able to serve the needs of agricultural producers worldwide.

Dense granular compound fertilizers for the basic fertilization of crops with nitrogen and phosphorus. The phosphorus content is 100% soluble in neutral ammonium citrate and over 90% water-soluble. All the types in the range are enriched with sulphur (number in brackets), calcium and magnesium which are also necessary macronutrients. Fitforfarm formula fertilizer can be more efficient source of nutrients than conventional fertilizers. They are used on all crops such as vegetables and ornamentals. These fertilizers include various combinations of the two elements of N and P.

**Enreaching**  
High Productivity

## Portfolio

- 20-20-0-(11S)
- 20-10-0-(12S)
- 22-11-0-(11S)
- 18-8-0-(20S)
- 23-21-0-(4S)
- 14-34-0-(S)
- 16-20-0-(S)
- 19-9-0-(12S)
- 24-12-0-(9,5S)

## Packaging and Storage

Fitforfarm NP compound fertilizers are available in 25 Kg., 50Kg and in bulk under plastic sheeting, mineral fertilizer, specialized containers. Store in covered storage facilities, protect the product from moisture.

## General specification of Fitforfarm ompound Formula Fertilizers:

- Primary Nutrients NP - Each tablet contain NP such as Nitrogen, Phosphorus.
- Secondary Nutrients Contain - Calcium, sulphur and magnesium also are required in large quantities by plants.
- Micronutrients although needed in very small amounts (g / ha) compared with macronutrients (kg / ha ), if there is a deficiency crop yield and quality may be affected in the same way. Neufarm compound formula fertilizers give solutions with mixing micronutrient per each tablet.

## Crops

All crops, depending on the nitrogen and phosphorus content of the soil, but with sufficient potassium content.

### SIEVE ANALYSIS

- + 2.00 - 4.00 mm : % 90,00 min.
- - 2.00 mm : % 3,00 max.
- Physical properties; Granular solid fertlizer, surface - treated
